## **THE PROGRAM OPTIONS**

To carry out its academic mission, South Georgia State College has instituted degree options to meet the needs of its diverse student clientele. Students should select the option best suited to their personal and career interests. Each student is assigned an academic advisor to assist the student in the selection of both short and long-term career goals. All degree pathways may be pursued on either the Douglas or Waycross campuses. The Bachelor of Arts in Professional Business and Technical Writing (BAPBTW), the Bachelor of Science in Nursing (BSN), the Bachelor of Science in Long-Term Healthcare Management (BSLTHM), and the Bachelor of Science in Biological Sciences (BSBS) degree programs are currently offered only in Douglas. The Bachelor of Science in Education (BSEd) and the Bachelor of Science in Management (BSM) may be pursued on either the Douglas or Waycross campuses.

### **THE ASSOCIATE OF ARTS DEGREE (AA) & THE ASSOCIATE OF SCIENCE DEGREE (AS)**

These degrees consist of 60 semester credit hours plus four hours of health and physical education requirements. Students who pursue the Associate of Arts or Associate of Science degree are enrolled in transfer pathways designed to lead to the bachelor's degree at a senior college or university. Specific options are spelled out in the pages that follow this section. Students who earn the Associate of Arts or the Associate of Science degree have fulfilled completely all Core Curriculum requirements (see page 70).

### **THE ASSOCIATE OF SCIENCE IN NURSING DEGREE (ASN)**

The Associate of Science in Nursing Degree consists of 70 semester hours plus two hours of physical education requirements. Students who complete this degree are eligible to apply to take the National Council Licensure Examination for Registered Nurses, successful completion of which entitles the nurse to practice nursing and to use the title Registered Nurse (RN).

### **THE BACHELOR OF ARTS IN PROFESSIONAL BUSINESS AND TECHNICAL WRITING (BAPBT)**

The Bachelor of Arts in Professional Business and Technical Writing consists of 125 semester hours, which could include hours in pursuing an AA degree in English or a related field or an AS degree in Business or a related field.

### **THE BACHELOR OF SCIENCE IN BIOLOGICAL SCIENCES (BSBS)**

The Bachelor of Science in Biological Sciences consists of 124 semester hours, which includes 64 hours earned in pursuing an AS in Biology or related degree. Biological Sciences offers students two options: a Nature and Ecology track or a Pre-Professional track.

### **THE BACHELOR OF SCIENCE IN EDUCATION (BSEd)**

The Bachelor of Science in Education is focused on Elementary/Special Education and consists of 125 semester hours, which includes 64 hours earned in pursuing an AS in Education with an emphasis in Elementary/Special Education.

### **THE BACHELOR OF SCIENCE IN LONG-TERM HEALTHCARE MANAGEMENT (BSLTHM)**

The Bachelor of Science in Long-Term Healthcare Management consists of 120 semester hours, which could include hours earned in pursuing an ASN degree. Graduates of this program will have the skill to coordinate care among interdisciplinary health care professionals, community agencies, and long-term care facilities.

## **THE BACHELOR OF SCIENCE IN MANAGEMENT (BSM)**

The Bachelor of Science in Management consists of 124 semester hours, which includes 64 hours earned in pursuit of an AS in Business Administration. The BSM degree requires the completion of two of three concentrations: Management and either Organizational Behavior or Marketing.

## **THE BACHELOR OF SCIENCE IN NURSING DEGREE (BSN)**

The Bachelor of Science in Nursing Degree consists of 122 semester hours, which includes hours earned in pursuing an ASN degree. This program requires that the entering student possess a current valid RN license.

## **ACADEMIC PROGRAM ORGANIZATION, DIVISIONS AND SCHOOLS**

Whether it leads to an Associate's or a Bachelor's degree, each degree option is divided into six areas: Essential Skills; Institutional Options; Humanities/Fine Arts; Science, Mathematics, and Technology; Social Sciences; and major courses. The Associate of Science in Nursing Degree includes courses from similar areas. The College believes that requiring work in these areas provides a sound general education base for its students. The nature and number of hours required in these areas will vary according to the student's program of study.

### **ACADEMIC SCHOOLS**

The College is organized by Schools. The present structure involves the School of Arts and Professional Studies, the School of Nursing, and the School of Sciences.

#### **SCHOOL OF ARTS AND PROFESSIONAL STUDIES**

The instructional programs of the School of Arts and Professional Studies are based upon the belief that the quality of life is enhanced by the acquisition of knowledge about self, others, and career. To meet these objectives, the School offers a variety of courses for academic transfer and career pathways. Pathways in the School lead to the Associate of Arts degree, the Associate of Science degree, the Bachelor of Professional Business and Technical Writing degree, the Bachelor of Science in Education degree, and the Bachelor of Science in Management degree. Toward these ends, the School offers courses in history, art, music, political science, sociology, theatre appreciation, English composition, economics, anthropology, business and accounting, Spanish, speech communication, world literature, American and British literature, Humanities, logistics, education, criminal justice, psychology and computer information systems. The School also offers courses in practical work in journalism, theatre, chorus, and creative writing.

In addition to attracting guest lecturers, providing individualized instruction, and offering course credit by examination, the School sponsors on-campus symposia and encourages off-campus learning experiences such as college-community sponsored field trips and internships that can complement and supplement the traditional classroom activity. Students may also benefit from the use of learning laboratories designed for word processing, accounting, and computer information systems.

#### **SCHOOL OF SCIENCES**

The School of Sciences offers the Associate of Science degree program with courses in biology, chemistry, computer science, health/human performance, mathematics/pre-engineering, physics/pre-engineering, pre-allied health, and recreation, and the BS degree in Biological Sciences. Completion of an approved AS pathway prepares the student for transfer to a four-year college or university. In addition, science and mathematics courses help non-science majors develop the background necessary to make informed choices on many issues affecting modern societies. Health and physical education courses help students to develop the knowledge and skills necessary to maintain a healthy mind and body.

#### **SCHOOL OF NURSING**

The School of Nursing offers the Associate of Science in Nursing, the Bachelor of Science in Nursing, and the Bachelor of Science in Long-Term Healthcare Management degrees. The School of Nursing ASN and BSN programs maintain full approval by the Georgia Board of Nursing. The ASN and BSN programs are accredited by the Accreditation Commission for Education in Nursing (ACEN). ASN graduates are eligible to apply to take the National Council Licensure Examination for Registered Nurses, successful completion of which entitles the graduate to practice as a Registered Nurse (RN). BSN graduates will acquire an educational credential increasingly in demand by most healthcare providers.

## THE CORE CURRICULUM AND AA AND AS PATHWAYS

In accord with the policies of the Board of Regents of the University System of Georgia, the College has established a Core Curriculum which offers students a broad general education covering essential skills; institutional options; humanities/fine arts; science, mathematics, and technology; and the social sciences. In addition, students are given the opportunity to begin study in a specific academic pathway leading to transfer into a baccalaureate degree program. The Core Curriculum was established to provide the same general education for students throughout the system of public higher education in Georgia and to facilitate transfer between the various units of the University System of Georgia. Courses in the Core Curriculum apply to the freshman and sophomore years, and successfully completed Core areas will transfer with full credit to any other University System of Georgia institution. Students who earn the Associate of Arts degree or Associate of Science degree will have fully completed Core requirements. To complete all Core Curriculum requirements, the student must complete 42 semester credit hours of the core curriculum as follows:

AREA A: Essential Skills	9
AREA B: Institutional Options	4
AREA C: Humanities/Fine Arts	6
AREA D: Science, Mathematics, and Technology	11
AREA E: Social Sciences	12

In addition to the 42 hours of core curriculum courses required in all AA and AS pathways of study, all AA and AS pathways with the exception of the Associate of Science in Nursing Degree require an additional 18 semester credit hours of courses related to the program of study (Area F), 2 semester credit hours of Health, and 2 semester credit hours of Physical Education, for a total of 64 semester credit hours.

AREA F: Courses Related to the Program of Study	18
Health and Physical Education	<u>4</u>
TOTAL	64

It is the student's responsibility to discuss academic plans and desired course selections thoroughly with his or her assigned faculty advisor in order to determine exactly which courses should be taken. All students are to consult with their faculty advisors in planning their course selections prior to registration for each semester. The various academic pathways appropriate to the different academic disciplines have been approved for University System institutions and should be followed if the student plans to transfer to a senior college or university within the University System of Georgia. Students who change degrees or associated pathways may have to complete additional hours of coursework beyond those required for completion of the pathway. A student who experiences difficulties in transferring credit to a University System of Georgia institution should contact the Chief Transfer Officer at that institution or at South Georgia State College. The Chief Transfer Officer at SGSC is the Director of Enrollment Services.

Students who plan to transfer to a college or university other than a University System institution should refer to the catalog of the senior college to which they intend to transfer. In some of the major academic areas, certain courses may not be taught at this institution. Again, students are urged to consult with their assigned faculty advisors to determine the extent of the applicable course offerings at South Georgia State College. Students are advised to follow the Pathway Map for their plan of study for timely completion of their program.

## FOCUS AREAS

Focus areas are categories into which AA and AS academic pathways are grouped, and certain courses (referred to as Focus Courses) taken within the first thirty hours are common to all pathways within the focus area. Students are thus provided exposure early in their studies to courses that will help them affirm that the degree program they have chosen best suits their interests and career goals.

Focus areas and their respective AA and AS academic pathways at SGSC are as follows:

Arts – includes Theatre (AS).

Business – includes Business Administration (AS) and Logistics (AS).

Education – includes Early Childhood (AS), Middle Grades (AS), Secondary (AS), Special Education (AS), Speech/Language Pathology (AS), and Health/PE (AS).

Health Professions – includes Allied Health (AS), Health and Human Performance (AS), and Nursing (AS).

Humanities – includes English (AA) and Foreign Language (AA).

Social Sciences – includes Communication (AA), Criminal Justice (AS), History (AA), Political Science (AA), Psychology (AA), and Sociology (AA).

STEM (Science, Technology, Engineering, and Mathematics) – includes Biology (AS), Chemistry (AS), Computer Science (AS), Mathematics (AS), and Physics (AS).

Students who may be undecided in a specific academic pathway should consider starting in one of the focus area pathways. Focus area pathways enable students who are undecided in their future studies and/or career goals to start in a pathway relative to their interests that can lead to a viable degree program. Courses taken in the focus area pathways are designed to assist students in making choices best suited to their interests and skills. Thus, as students progress in focus area pathways, they should be able to transition into appropriate academic pathways designed for transfer or degree attainment.

## FOCUS AREA: ARTS

The Arts focus area is designed to allow students to explore various fine arts fields with an intent to continue their studies after transition into fine arts programs, such as Theatre. The goal of this focus area pathway is to encourage the development of a strong curricular foundation in the fine arts while allowing the student to explore areas of interest more deeply through a selection of focus classes. Academic advisement for this area is provided by the School of Arts and Professional Studies.

**FOCUS AREA: STEM**

The Science, Technology, Engineering and Mathematics (STEM) Focus Area is the perfect place for students interested in sciences, engineering, mathematics or computers. With a STEM degree, students can transfer to major universities to become medical doctors, pharmacists, marine biologists, petroleum engineers, computer programmers, and forensic scientists, to name just a few valuable professions. The goal of this focus area pathway is to encourage the development of a strong curricular foundation in STEM while allowing the student to explore areas of interest more deeply through a selection of focus classes. Academic advisement for this area is provided by the School of Sciences.

## ASSOCIATE OF SCIENCE: BIOLOGY

Students completing the program may pursue a bachelor's degree in biology at SGSC or elsewhere or a related field at a senior college or university. Biologists study living organisms and the relationship between organisms and their environment. Most careers in biology require graduate study in a life science area. Many optometrists, veterinarians, and medical doctors major in biology. Other career opportunities include work in botany, agronomy, animal science, ecology, toxicology, pathology, physiology, and biological oceanography. Academic advisement for the program is provided by the School of Sciences.

## ASSOCIATE OF SCIENCE: LOGISTICS

Students who complete this program are prepared to pursue the bachelor's degree in business administration with a major in logistics and intermodal transportation at a senior university awarding this degree, such as Georgia Southern University. Transportation firms, industry and government alike employ graduates trained and qualified in the coordination of intermodal transportation and supply chain management. With appropriate advisement, the A.S. degree in Logistics also prepares graduates for the bachelor's degree in accounting, economics, finance, general business, international business, industrial relations, management, management systems, marketing, real estate, risk management, and insurance. Academic advisement for this program is provided by the School of Arts & Professional Studies.

## ASSOCIATE OF SCIENCE: MATHEMATICS OR PRE-ENGINEERING

Students who complete this program are prepared to pursue the bachelor's degree in mathematics, engineering, or a related field at a senior college or university. Theoretical mathematicians develop new principles and new relationships between existing principles of mathematics. Applied mathematicians develop mathematical approaches to solve practical problems in business, government, engineering, and the sciences. Related career opportunities include education, actuarial science, operations research, and statistics. Academic advisement for this program is provided by the School of Sciences.

## ASSOCIATE OF SCIENCE: PHYSICS OR PRE-ENGINEERING

Students who complete this program are prepared to pursue the bachelor's degree in physics, engineering, or a related field at a senior college or university. Physicists use systematic observation and experimentation to investigate the structure of the universe and the interaction of matter and energy. Career opportunities include education, research, and product development. Engineers develop practical applications for scientific discoveries. Many career opportunities are found in subspecialties such as aerospace, chemical, civil, electrical, industrial, mechanical, mining, nuclear, and petroleum engineering. Academic advisement for this program is provided by the School of Sciences.

## BACHELOR OF SCIENCE IN BIOLOGICAL SCIENCES

The South Georgia State College Bachelor of Science in Biological Sciences offers students two options to engage in learning experiences that lead to rewarding careers. Students in the Nature and Ecology track will engage in study related to the unique ecological sites in the region and, upon completion, may seek advanced study or find employment in a variety of fields within governmental and private sectors. The Pre-Professional track is designed to meet prerequisite courses for entry into the professions of medicine, dentistry, pharmacology, and other health-related fields.

## BACHELOR OF SCIENCE IN LONG-TERM HEALTHCARE MANAGEMENT

Students who earn this degree will develop educational skills and knowledge necessary for managers of long-term healthcare provided in patient residences and long-term care facilities. The program focuses on serving the aging, as well as individuals of any age who suffer from debilitating physical and mental disorders. The program curriculum and training experiences address a variety of healthcare concepts and practices, such as adult health, aging, and developmental disabilities across the lifespan, acute care, subacute care, chronic disease management, psychiatric issues, mental health, disease management, health promotion, and health restoration. The program also focuses on leadership, organizational structure, human resources management strategies, operations management, finance, health law, marketing, communication, and decision-making. Additionally, students gain an increased understanding and knowledge of quality healthcare systems relating to quality assurance, risk management, managed care, insurance, ethics, and other information and practices important to managing in a demanding healthcare environment. Graduates of this program will have the skill to coordinate care among interdisciplinary health care professionals, community agencies, and long-term care facilities, all of which will increase quality of life and improve long-term outcomes.

## BACHELOR OF SCIENCE IN MANAGEMENT

The Bachelor of Science in Management program is designed to allow students to complete two of three concentrations, each consisting of 24 credits of upper-level coursework. The concentrations are also intended to link coursework with work experiences in the areas of Management and either Organizational Behavior or Marketing. The goal of the program is to elevate the knowledge and skills of individuals who already possess the A.S. in Business and who seek the knowledge and skills needed to be effective middle managers or small business owners or who seek career advancement. Students who have not completed the Area F requirement may take up to 12 hours of these courses concurrently as program electives. The Bachelor of Science in Management program is offered on the Douglas campus only.
