Opportunities Matter Here.

New for Fall 2014!

Bachelor in Biological Sciences

The South Georgia State College Bachelor of Science in Biological Sciences offers SGSC students two options to engage in learning experiences that lead to rewarding careers.

Students in the Nature and Ecology track will engage in study related to the unique ecological sites in the region and, upon completion, may seek advanced study or find employment in a variety of fields within governmental and private sectors.

The Pre-Professional track is designed to meet prerequisite courses for entry into the professions of medicine, dentistry, pharmacology, and other health-related fields.

Both tracks will cultivate personal responsibility for the environment and foster the importance of stewardship.
