Students who earn the Associate of Arts degree in History can transfer to almost any major or program at a senior college or university confident that the skills and knowledge acquired will be useful. However, the careers and occupations for which this preparation is especially helpful are archival service, communications, curators for museums and galleries, education (in numerous disciplines including history at the elementary, secondary, and college levels), foreign service, government service, historic preservation, international business, journalism, law, library science, military science, armed services, and public administration.

This map is not a substitute for academic advisement—contact your advisor if you have any questions about scheduling or about your degree requirements. Also, see the current undergraduate catalog for a complete list of requirements, electives, and pre-requisites. This is a typical schedule. Depending on course availability, other courses in the IMPACTS domain may be substituted. Discuss any substitutions with your advisor. (FoS Field of Study)

The USG core curriculum, Core IMPACTS, is designed to ensure that students acquire essential knowledge in foundational academic domains and develop career-ready competencies. There are seven Core IMPACTS domains. As presented in the table below, IMPACTS is a mnemonic to emphasize the impact of the overall core curriculum.

Core IMPACTS

- Institutional Priority
- Mathematics & Quantitative Skills
- Political Science and U.S. History
- Arts, Humanities & Ethics
- Communicating in Writing
- Technology, Mathematics & Sciences
- Social Sciences
