

Associate of Science: Math Pathway Map

This academic map is a suggested two-year schedule of courses based on degree requirements in the SGSC catalog. *Missing milestones could delay your program.*

Students who complete this program are prepared to pursue the bachelor's degree in mathematics or mathematics education. Theoretical mathematicians develop new principles and relationships. Applied mathematicians develop mathematical approaches to solve practical problems in business, government, engineering, and the various sciences. Possible career opportunities after additional education include: actuary, statistician, economist, operations research analyst, mathematical technician, applied mathematician, theoretical mathematician, math educator, and numerous engineering disciplines (aerospace, biomedical, chemical and biomolecular, civil, computer, electrical, mechanical, etc.).

This map is not a substitute for academic advisement—contact your advisor if you have any questions about scheduling or about your degree requirements. Also, see the current undergraduate catalog for a complete list of requirements, electives, and pre-requisites. This is a typical schedule. Depending on course availability, other courses in the IMPACTS area may be substituted. Discuss any substitutions with your advisor. (FoS Field of Study)

The USG core curriculum, Core IMPACTS, is designed to ensure that students acquire essential knowledge in foundational academic areas and develop career-ready competencies. There are seven Core IMPACTS areas. As presented in the table below, IMPACTS is a mnemonic to emphasize the impact of the overall core curriculum.

Core IMPACTS
Institutional Priority
Mathematics & Quantitative Skills
Political Science and U.S. History
Arts, Humanities & Ethics
Communicating in Writing
Technology, Mathematics & Sciences
Social Sciences
